Portion and Plate Structure

Recovery

Sleep: 7 - 8hrs
Target Sleep Time: Before 10:00 PM. Goal is to improve sleeping pattern to optimize Metabolism.

Eating According to Your Training and Daily Load

For Fat Loss + Performance (2 Meals + 1 Snack)

Macro Focus: 40% Protein • 50% Carbs • 10% Fats

1. Pre-Workout Fuel (Use Carbs to Power Your Training)

WHEN TO EAT: 60–90 minutes before your workout

WHAT TO EAT:

Prioritize **carbs and protein**, and keep fats low for easy digestion

Examples:

1 Banana + 1 Scoop Whey

½ Cup Cooked Rice + 1 Boiled Egg

1 Apple + Low-Fat Greek Yogurt

2. Post-Workout Recovery (Refuel and Rebuild)

WHEN TO EAT: Within 60 minutes after your training

WHAT TO EAT:

- Rebuild with **protein + moderate to high carbs**
- Use your **main meal** as your post-workout meal
- Example:
 - 100g Chicken + 1¼ Cup Rice + 1.5 Cups Veggies
 - OR: 100g Fish + 1 Scoop Whey + 1 Cup Brown Rice

3. Rest Day Adjustments (Lower Carbs, Keep Protein High)

WHEN: On days with little to no training

WHAT TO CHANGE:

- Slightly **reduce rice or fruit portions**
- **Keep protein consistent**
- Maintain **veggies and fiber for fullness**
- Example:
 - 100g Chicken + ½ Cup Rice + 2 Cups Veggies
 - 1 Scoop Whey + 1 Apple (no banana or sweet potato)
