

Olympic Lifting + Squat Cycle

Weeks 5 and 6

Structured continuation of the cycle with a heavy intensification block followed by a technical deload week. Built around the same program DNA: Prep, Olys, Squat Cycle, and Cooldown.

Program Focus	Olympic lifting skill, squat strength, and weekly load management
Frequency	3 sessions per week
Heavy Week	Week 5 starts main loading at 80% for the main Oly lifts
Deload Week	Week 6 reduces load to emphasize speed, positions, and clean volume

Week 5

Week 5 – Heavy Intensification

Heavy week. Increase stimulus, keep reps lower, sharpen positions under load, and push squat strength without excessive misses.

D-1 – Heavy Snatch + Back Squat

PREP

- 3 Sets: 3 Snatch DL, 3 Hang Snatch, 3 OHS
- 2 Sets: 20s OHS Hold, 6 Sots Press

PART 1: OLYS — Snatch

- @80% – 2 reps x 4 sets
- @85% – 2 reps x 3 sets
- @90% – 1 rep x 3 sets
- @92% – 1 rep x 1–2 sets if sharp

Notes

- Fast turnover
- Stable bottom position
- No chase forward
- Stop the heavy build if timing gets loose

PART 2: SQUAT CYCLE — Back Squat

- @82.5% – 4 reps x 4 sets
- @87.5% – 3 reps x 3 sets
- @90% – 2 reps x 2 sets
- Tempo: 2-1-1 on the first rep of every set

Notes

- Controlled descent
- Stay braced
- Drive hard out of the bottom

PART 3: COOLDOWN

- 45s Lat Stretch / side
- 45s Pigeon Stretch / side
- 45s Ankle Stretch / side

Heavy focus prioritizes quality under load and top-end barbell confidence.

D-2 – Heavy Clean + Front Squat

PREP

- 3 Sets: 3 Tall Clean, 3 Front Squat, 3 Push Press
- 2 Sets: 20s Front Rack Hold, 6 Jerk Dip + Drive

PART 1: OLYS — Clean

- @80% – 2 reps x 4 sets
- @85% – 2 reps x 3 sets
- @90% – 1 rep x 3 sets
- Then: Clean Pull @95% of Clean – 3 reps x 3 sets

Notes

- Full extension before turnover
- Fast elbows
- Strong stand on every clean

PART 2: SQUAT CYCLE — Front Squat

- @82.5% – 3 reps x 4 sets
- @87.5% – 2 reps x 3 sets
- @90% – 1 rep x 2–3 sets
- Pause: 1 sec in the bottom on first rep of each set

Notes

- Elbows stay high
- Upright torso
- No bounce-collapse in the hole

PART 3: COOLDOWN

- 45s Front Rack Stretch
- 45s Quad Stretch / side
- 30s Deep Squat Hold

Heavy front squat exposure reinforces clean recovery and upright positional strength.

D-3 – Heavy Clean and Jerk + Box Front Squat

PREP

- 3 Sets: 3 Clean Pull, 2 Hang Clean, 2 Split Jerk
- Build Set 3 Sets: 1 Clean + 1 Jerk

PART 1: OLYS — Clean and Jerk

- @80% – 1 rep x 4 sets
- @85% – 1 rep x 3 sets
- @90% – 1 rep x 2 sets
- @92–95% – 1 rep x 1–2 sets if quality is there
- Then: Split Jerk from Rack @85% – 3 x 2 sets

Notes

- Vertical dip
- Punch to stable lockout
- Recover front foot first if needed for consistency

PART 2: SQUAT CYCLE — Box Front Squat

- @80% – 4 reps x 3 sets
- @85% – 3 reps x 2 sets
- Then accessory: 3 sets of 8 2xDB RDL + 10 2xDB Walking Lunges @7–8 RPE

Notes

- Start each rep from control
- Keep trunk vertical
- Accessory work should challenge but not drain

PART 3: COOLDOWN

- 45s Hip Flexor Stretch / side
- 45s Adductor Stretch / side
- 1:00 Child's Pose Breathing

Week 5 finishes with the highest total neural demand of the cycle.

Week 6

Week 6 – Deload and Technical Restoration

Deload week. Lower intensity, add more technical reps, restore speed, reinforce positions, and keep enough volume to stay sharp.

D-1 – Snatch Complex + Back Squat Volume

PREP

- 3 Sets: 3 Snatch DL, 3 Hang Snatch, 3 OHS
- 2 Sets: 20s OHS Hold, 6 Sots Press

PART 1: OLYS — Snatch Complex (1+1+1)

- Hang Snatch + Snatch + OHS
- @65% – 3 sets
- @70% – 3 sets
- @75% – 2 sets

Notes

- Smooth pull
- Balanced catch
- Ride the bar into the bottom with control

PART 2: SQUAT CYCLE — Back Squat

- @70% – 5 reps x 4 sets
- @75% – 4 reps x 3 sets
- Tempo: 3-1-1

Notes

- Position over intensity
- Keep all reps crisp
- No grind reps this week

PART 3: COOLDOWN

- 45s Pigeon Stretch / side
- 45s Lat Stretch / side
- 30s Deep Squat Breathing Hold

Deload restores positions, speed, and repeatable technical quality.

D-2 – Clean + Front Squat Technique

PREP

- 3 Sets: 2 Tall Clean, 2 Front Squat, 2 Push Press
- 2 Sets: 20s Front Rack Hold, 6 Split Jerk Footwork Reps

PART 1: OLYS — Clean + Front Squat

- 1 Clean + 1 Front Squat
- @65% – 3 sets
- @70% – 3 sets
- @75% – 3 sets

Notes

- Smooth pull into strong rack
- Stand under control
- Quality day, not a test day

PART 2: SQUAT CYCLE — Front Squat

- @70% – 4 reps x 4 sets
- @75% – 3 reps x 3 sets
- Pause: 1–2 sec at bottom

Notes

- Reinforce bottom position
- Stay tall
- Move cleanly out of the hole

PART 3: COOLDOWN

- 45s Front Rack Stretch
- 45s Wrist Stretch
- 45s Quad Stretch / side

Technique-first front squat work reinforces posture and bottom-end control.

D-3 – Clean and Jerk Technique + Box Front Squat

PREP

- 3 Sets: 2 Tall Clean, 2 Front Squat, 2 Hang Clean, 2 Split Jerk
- Build Set 2 Sets: 1 Clean + 1 Jerk @ light-moderate weight

PART 1: OLYS — Clean and Jerk

- @70% – 1 rep x 4 sets
- @75% – 1 rep x 4 sets
- @80% – 1 rep x 2 sets
- Then: Split Jerk from Rack @75% – 4 x 2 sets

Notes

- Fast feet
- Clean lockout
- Save fatigue and keep quality high

PART 2: SQUAT CYCLE — Box Front Squat

- @70% – 4 reps x 4 sets
- @75% – 3 reps x 3 sets
- Then accessory: 2–3 sets of 10 2xDB RDL + 10 2xDB Walking Lunges @6–7 RPE

Notes

- Lighter week
- Groove positions
- Build tissue tolerance without extra fatigue

PART 3: COOLDOWN

- 45s Hip Flexor Stretch / side
- 45s Adductor Stretch / side
- 1:00 Breathing Reset

The deload ends with cleaner timing, better positions, and lower systemic fatigue.
